

# Project Management - Planning & Control Fundamentals

## *Online Professional Development Workshop*

### Course Summary

With so much emphasis on project work in commercial and industrial environments a good grasp of project management as a whole is a vital requirement. This module will provide delegates with an understanding of project management concepts and methodologies, with quantitative aspects of project management such as project scheduling (time, cost and resource analysis) and risk (probability analysis). It will also teach delegates a formalised process and understanding of the tools and techniques that can be used when starting up projects with an emphasis on the interpretation of the results.

### Course Content

This module will provide theoretical background and the breadth of view to plan, control and manage a project, applying project management techniques and methodologies, including risk, estimation, and management to project scenarios.

After attending this module, delegates will have a greater understanding of:

- Management techniques for controlling and implementing a project.
- How to develop an approach to ensure quality is maintained within the time, cost and scope limits, and to the satisfaction of the stakeholders.

### Course Content continued

- Successful implementation of a project in conjunction with enhancing interpersonal skills, motivation and dealing with stakeholders.
- Qualitative, quantitative and project planning techniques to project evaluation, selection, work breakdown, and risk management.

### Delivery Model

The University of Northampton is able to deliver this programme web-based to enable anytime/anywhere access. To ensure the delegates receive the best possible experience, delivery will comprise of creative presentations of material with interactive page types that incorporates informal self-assessment for enriched learning, designed with accessibility and inclusion benefits for all.

### Certification

This programme is a non-credit bearing professional development workshop that will provide all attendees with a University Certificate of Completion.
