

## UON Carbon footprint update

The UON set a carbon reduction target of 30% to be achieved by 2020 against the baseline year of 2005/06, the details of this can be found in the [Carbon Management Plan](#). We achieved a total 33% reduction in scope 1 & 2 emissions in 2020. The carbon footprint is also measured relative to our total FTE student. In 2005/06, the carbon footprint in scope 1 and 2 emissions was 7,381 (t) CO<sub>2</sub>e and the carbon footprint per FTE student was 0.9 (t) CO<sub>2</sub>e. The performance of these is shown in the graph below against the carbon reduction target. In 2020/21, the carbon footprint per FTE student was 0.39 (t) CO<sub>2</sub>e and our total carbon footprint in scope 1 and 2 was 3,950 (t) CO<sub>2</sub>e.
